

(A) BLACK POWDER CLEANER

Designed to clean and flush away all black powder fouling in conjunction with Navy Arms Lubricant and Sealer, which holds black powder fouling in a plasticized condition and renders it inert. This cleaner is a solvent that completely flushes away the lubricant and black powder combination. Lubricates 20 times longer than oil, does not attract dust and prevents rust. Your Navy Arms Solvent is the only thing needed for the care, cleaning and maintenance of any muzzle loader.

(B) MINI BALL SEALER AND LUBRICANT

Fill the cavity of mini ball with Mini Ball Sealer and wipe a small amount into the grease ring from the base as you insert it into the muzzle. Also, place a light coating around the nipple area to protect the metal from black powder caking. This lubricant is designed to help seal the ball, prevent rust and keep fouling soft for an indefinite period of time. It creates no residue, produces no odor and inhibits the rust and corrosion normally associated with black powder. The shooter will find that with constant use, it will prevent the caking of black powder in the barrel for an indefinite number of shots and facilitate cleaning.

CAT. NO. MBS-502

(C) REVOLVER SEALER AND LUBRICANT

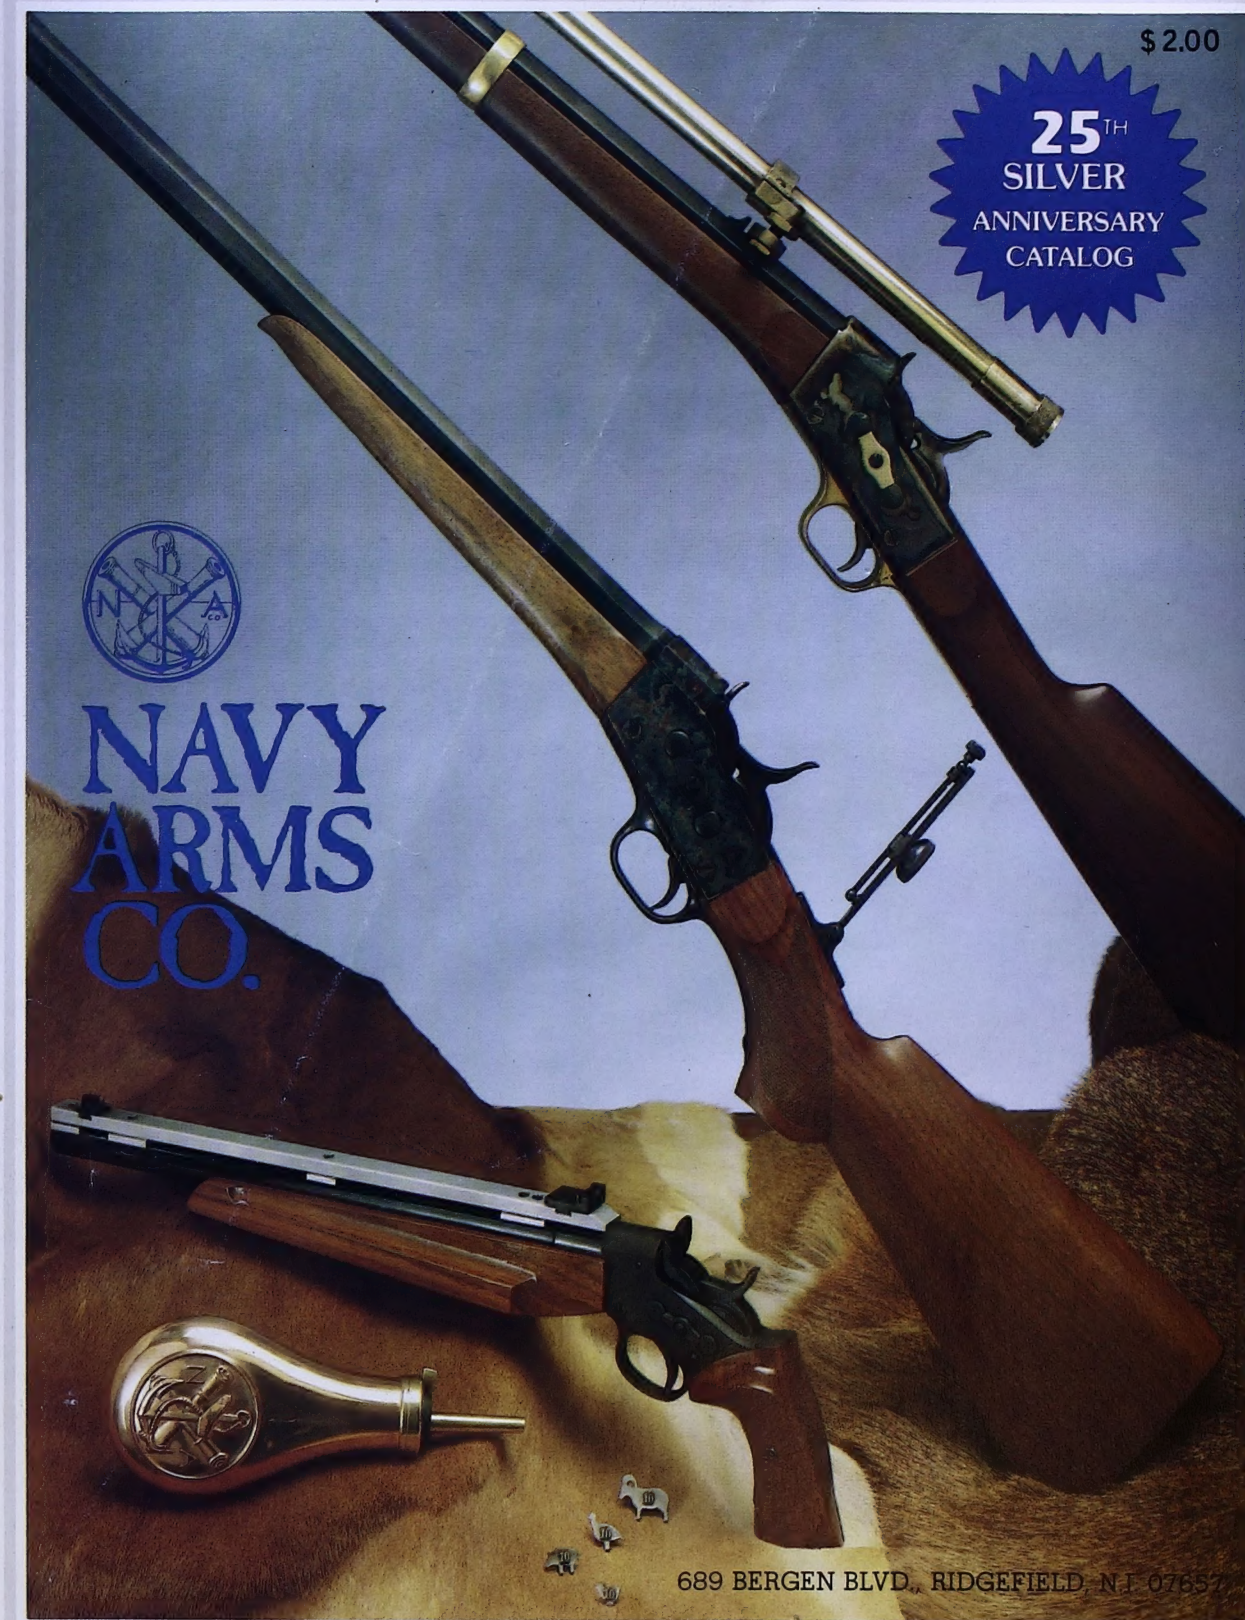

After loading, place a small amount over each ball and run the rammer in again to force it around the ball. After firing, wipe all exposed parts with the lubricant to dissolve all black powder fouling and protect against rust. This combination lubricant and gas sealer will prevent rust and keep black powder fouling soft for an indefinite period of time. Revolver seal will leave no residue and will provide longer shooting periods between cleaning. Will protect any gun from rust and corrosion for an indefinite period.

CAT. NO. RSL-501

(D) SHOTGUN SEALER AND LUBRICANT

Place a light coating around the base of the plastic or felt wad and a small dab in the base of the wad. This lubricant is designed to reduce the build-up of fouling, creates no residue, produces no odor and inhibits the rust and corrosion normally associated with black powder.

the NAVY

Val Forgett has long been known as the founder of the replica black powder industry. He has been shooting muzzleloading firearms virtually all of his life, starting with a musket at the age of eight. Later, while attending Clemson University, he won a number of major matches using original muzzleloading weapons. His military service was spent at the Aberdeen Proving Grounds, as a technical advisor and firearms expert.

In 1957 he founded Service Armament Co. This company achieved immediate success and soon grew to encompass the importation, sale and distribution of sporting military weapons from all over the world.

During this time, Val Forgett became active in the North-South Skirmish Association, an organization that reenacts various periods of the American Civil War, wearing authentic uniforms and utilizing original weapons of the period. N-SSA members formed different units and then competed against each other. Naturally these "mock battles" took a heavy toll on the already valuable 19th Century black powder firearms. For years, Mr. Forgett felt that there was a great need for replica weapons, as original weapons were pricing themselves out of the market and shooters were buying all of the "mint" originals and then proceeding to shoot them to pieces. He also felt that many of the earlier weapons were made by "guess and by God metallurgy"; thus, the renewed shooting of these guns after they had been victims of over 100 years of rust and corrosion rendered many of them unsafe to shoot—not to mention the unavailability of parts and the scarcity of gunsmiths who were familiar enough with black powder arms to maintain them. As an engineer, Val knew that with modern materials and advanced manufacturing techniques, safe muzzleloading replicas could be made at a price everyone could afford, not only to own, but to shoot with the utmost safety and confidence. This would give the average man an opportunity to acquire and shoot guns that would otherwise be far too prohibitive in price for him to ever possess.

In the fall of 1957, Mr. Forgett visited all of the major arms manufacturing centers of the World—Birmingham, England; St. Etienne, France; Liege, Belgium; Ferlach, Austria and then to Italy. He spoke with most of the large, as well as the small, arms makers and found the environment in Italy to be ideal for the limited production of replica firearms.

Mr. Forgett started with a copy of the 1851 Navy, originally manufactured by Colt from 1850 through 1876. This was the most popular of the Union Revolvers during the War Between the States, as it was lighter and handier than its predecessor—the Dragoon. At the same time, Forgett decided to manufacture the .36 caliber Griswold & Gunnison Revolver, also known as the Reb Model 1860. This brass-framed revolver was originally produced in limited quantity by Samuel Griswold in Griswoldville, Georgia from 1862-1864 and was known for its quality. Mr. Forgett found that he could manufacture both of these revolvers, which he nicknamed the "YANK" and the "REB", on the same tooling and that he would then have the standard revolver of both the North and the South used in the American Civil War. Thus, Val Forgett created Navy Arms Co. in 1958 to market these new-made cap and ball revolvers, and the names "YANK" and "REB" became registered trademarks of the firm, denoting the first two Navy-styled guns to be produced by the company. For its symbol, Navy Arms adopted the seal of the Confederate States Navy.

The Val Forgett—Navy Arms "YANK" was the first gun to be completely investment cast. A small Italian tool firm, Gregorelli and Company, made the initial samples. After approval, Navy Arms Co. began a limited production of approximately 100 guns per month. Both the "YANK" and the "REB" met with immediate success. They were the first machine-made percussion muzzleloading revolvers to be produced in over 80 years, thereby heralding the rebirth of an industry.

Shortly thereafter, the then-fledgling firm of Antonio Zoli and Company started to produce a replica of the .58 caliber Zouave Rifle for Mr. Forgett. The Zouave replica was originally a modified version of the Mississippi Rifle and was used during the Civil War by the New York State Militia. The well-made Zouave, which mirrored the pinnacle of firearms technology of the percussion era, was eagerly snatched up by both black powder shooters and collectors.

Navy Arms Co. by this time had grown to the point where it needed its own building. Consequently, the Bogota National Bank of Bogota, New Jersey was purchased by Mr. Forgett in 1958 for the new home of Navy Arms. The national interest in muzzleloaders was now beginning.

No one else had ever done anything like this before and at first there was some market resistance to the newly-made black powder arms. But by taking his replica guns out and personally demonstrating them in shooting exhibitions throughout the world, this resistance was overcome. Mr. Forgett also took his replica arms on hunting trips throughout the United States, Africa and India where he proved that these muzzleloaders were indeed effective firearms, which could successfully be used for target shooting, as well as hunting. Mr. Forgett was the first man in over 100 years to successfully confront African game such as lion, hippo, wild boar, elephant, cape buffalo and leopard with a single-shot muzzleloader, the Buffalo Hunter. This gun was nicknamed by the natives as "old-meat-on-the-table" because everytime the gun went off they knew that everyone would be eating well that night!!

ARMS story...

It took courage and faith in a vision and a product to start this project and to carry it through. But Val Forgett had this courage and faith not only to produce and research the guns, but to possess the technical know-how to select the guns to be produced and then to actually shoot them under a variety of conditions and situations.

In 1960, Navy Arms Company was moved from Bogota, New Jersey to larger facilities in Ridgefield, New Jersey. Today, Navy Arms replicas are being made by dozens of manufacturers and are supplied not only to Navy Arms Co., but also to other companies throughout the world. This led to the production of parts, as well as the complete guns, for companies such as Colt, Winchester and other well-known names in the arms industry. With the basic knowledge and know-how taught to others by Mr. Forgett, other countries have also begun producing parts for replica firearms.

In the past 25 years, Val Forgett has made over 100 trips from the United States to Europe to work on a variety of replica manufacturing projects. As a result, companies in Belgium, Italy, Japan, England, Germany and the United States have now produced more revolvers of the Confederate type than the Confederate States of America did throughout the Civil War; more Zouave Rifles and percussion Remingtons than Remington ever produced; more Harpers Ferry flintlock pistols than the Harpers Ferry Arsenal ever made; more Walker Dragoons and Colt Patersons than the Colt Paterson factory produced in its entire history. With this continuous growth, the black powder firearms industry will shortly have produced more replicas than originals. But Val Forgett's interest did not stop with muzzleloaders. Early frontier-era cartridge arms also caught his attention!!

"If a single individual can be credited for 'reintroducing' the .44/40 to today's shooters, that must be Val Forgett of Navy Arms. Beginning in 1960 Forgett sought the services of Italian gunmakers and eventually had made good, solid copies of Winchester's Models 66 and 73 rifles and carbines, and Remington's Model 1875 revolvers. Soon after Forgett rebled the trail, other .44/40 guns began to appear—mostly Italian copies of the Colt Frontier Six-Shooter."*

In the early 1970's Mr. Forgett acquired Replica Arms, which manufactured American Revolutionary replicas, of Marietta, Ohio and then built a plant in Union City, N.J. At this plant, he is now manufacturing the British Flintlock Dragoon Pistol, the Colonial Williamsburg Sword and the Brown Bess Musket—all for the restoration of the Governor's Palace at Colonial Williamsburg, Virginia. At this plant, Navy Arms is also creating a series of limited production replicas, the percussion Morse Rifles and Shotguns, the Navy Arms Hawken, the Henry Rifles and Carbines, the Remington Rolling Block Rifles, the Greener Harpoon Gun—only to name a few.

In 1975 Mr. Forgett learned that the World Black Powder Shooting Championships using muzzleloading firearms were being held on a regular basis in Europe and discovered to his amazement that American shooters were not competing. With the help of others and with the knowledge that the United States never suffered from lack of excellent marksmen, as has been proven over and over throughout its history, Mr. Forgett set about forming a United States Team. The following September, 17 men and women flew to France to compete for the first time as the U.S. International Muzzleloading Team, shooting against top muzzleloading marksmen from other countries. When the results were tallied, the U.S. Team had established five new world records and had won the World Musket Cup with a score of 90 points over the old world record. The Team has gone on under Mr. Forgett's chairmanship to win the world championship again in Zurich, Switzerland in 1977, in Madrid, Spain in 1978 and in Quantico, Virginia in 1980. (There was no shoot in 1979).

On April 4, 1978, Mr. Forgett was knighted by the Italian Government for the founding of the replica arms industry in the Gardone Valley.

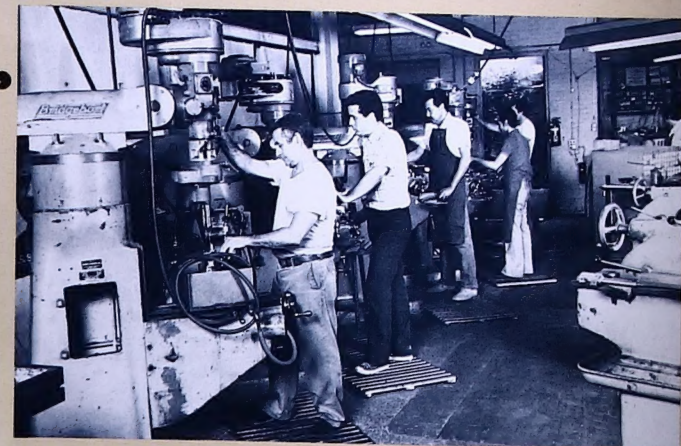

Mr. Forgett purchased the black powder division of the Ithaca Gun Company and is now making the well-received Ithaca/Navy Hawken in both flint and percussion in .50 and .54 calibers. Classic Arms in Palmer, Mass. was purchased by Mr. Forgett in 1977 and has since been relocated to Union City, New Jersey.

As always, Navy Arms continues to bring shooters something new and exciting. Examples are the Remington Revolver made entirely of stainless steel, introducing an improved non-corrosive percussion cap, introducing the first black powder shotshell and .50-70 cartridge—and now a rimfire cartridge for use in original .41 caliber derringers.

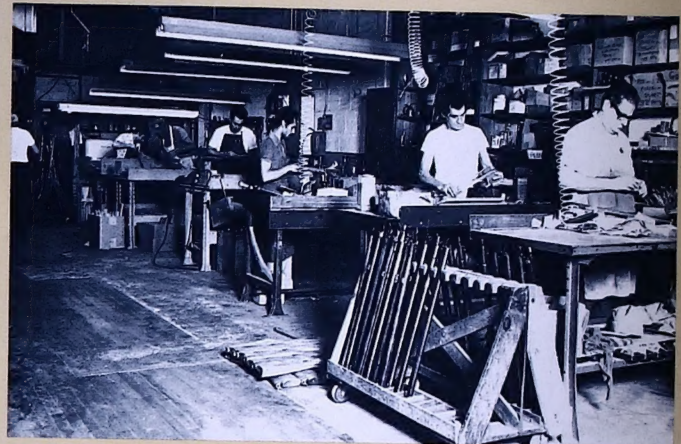

Val Forgett was the first to mass produce replica firearms, the first to offer quality muzzleloaders to the mass market and continues to offer a truly fine and proven line of sporting and hunting rifles and pistols for the target shooter, hunter and collector. Under his leadership the black powder muzzleloading industry is a story of success through hard work and diligence striving to make a dream come true.

NAVY ARMS CO. 1982 MUZZLELOADERS' ANNUAL

Colorful 80-page magazine featuring articles on How to Cast Bullets, Detecting Counterfeit Guns, Dueling, Muzzleloading Artillery, buckskinning, hunting and a catalog section. Mod. No. NAA082

GREENER LIGHT MODEL HARPOON GUN

THE GREENER HARPOON GUN

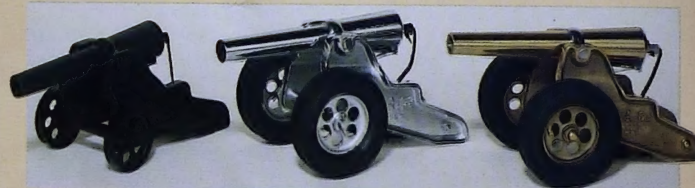

This gun has been designed primarily for taking the smaller mammals and big game fish, where it is found impracticable to take them with the usual forms of bait and tackle.

The action employed is of the well-known Martini type, strong and reliable. It is fitted with a very efficient safety bolt actuated by a thumb lever on the side of the action body.

The barrel is detachable. The muzzle end for 12 inches is ground parallel externally and is of such a size that it passes easily within the shank of the harpoon. The fore-end is adapted to take the line-release frame which is detachable and consists of two arms of polished material fixed to a metal base bar. The arms converge slightly to facilitate the releasing of the line.

The complete Outfit consists of: The Gun; Line-Release Frames; Cleaning Rods, Harpoons, Shooting Lines, Cartridges, Cleaning Implements and Tin of Oil. The whole is packed in a Fiberglass Carrying Case. Manufactured and Distributed World Wide Exclusively by Navy Arms Co. Mod. No. HRPGUN

SIGNAL CANNON

All three models are chambered for the Standard Winchester 2-7/8—10 ga. blank.

MODEL 1898 STANDARD BLACK

Features a blued steel polished barrel and breech assembly mounted on a japan enamel undercarriage. It is a reproduction of the Winchester '98 Signal Cannon exact in every detail. It is manufactured from the original drawings and incorporates the very same patterns in its construction. Even the original wooden pine box for shipment has been duplicated.

Length: 16"
Height: 7"

Width: 6-1/2"
Weight: 15 lbs.
Mod. No. WSLBLK

MODEL 1898 DELUXE CHROME

All parts are chrome plated and mounted on original Firestone rubber tires.

Length: 16"
Height: 8"

Width: 8"
Weight: 17 lbs.
Mod. No. WSCDEL

MODEL 1898—PRESENTATION MODEL

A superb example of the gunmakers art, including a polished solid brass barrel, high lighted solid brass carriage and wheels with Firestone tires. All working parts in the breech assembly and the trunion, are made of stainless steel to make it a perfect marine piece. Add to this a mirror finished mahogany carrying chest with brass hardware and rope handles. A brass plate mounted on the top cover will be engraved to your wish and the chest is so designed to permit the cannon to be fired while mounted in the base with the top removed.

Length: 16"
Height: 8"

Width: 8"
Weight: 17 lbs.
Mod. No. WSCPRS

FLINTLOCKS

The flintlock was developed in Middle Europe in the early 1700's. It utilizes a piece of flint secured by a screw through a set of steel jaws. Ignition takes place with the hammer striking the frizzen which acts as a pan cover. Located in the pan is a small amount of fine black powder. When the sparks from the flint drop into the black powder, the powder ignites and a spark flashes through a small hole in the barrel, thus igniting the main charge.

(A) KENTUCKY FLINTLOCK PISTOL— .44 cal.

The Kentucky Pistol was developed later than the Kentucky Rifle in the late 1760's in the areas of Eastern Pennsylvania, New York, New Jersey and Ohio. Approximately one pistol was produced to every 250 rifles. It was used as a protective weapon by frontiersmen and officers of the American Army during the Revolutionary period. The pistol followed closely in style and mechanical characteristics to its contemporary rifle—slender, small caliber, usually stocked to the muzzle and fitted with brass furniture. Bbl. Length: 10-1/8" O.A.: 15-1/2" Weight: 2 lbs. Rec. Ball Dia.: .423 R.B. Features a blued rifled barrel. Color-case hardened lock, brass furniture and trigger guard. Fixed sights.

Finished	Mod. No. PFL776

Single Cased Set*	Mod. No. SDC778
Double Cased Set**	Mod. No. DDC778

(C) HARPERS FERRY FLINTLOCK PISTOL— .58 cal.

Model 1806. Made at Harpers Ferry Armory, VA. between 1806 and 1808. Approximately 4,100 produced. This pistol was one of the first military handguns manufactured by a national armory. Its historical importance, as well as its attractive appearance have combined to make it one of the most popular collector's items among U.S. martial firearms. The Harpers Ferry Pistol is one of the best known of all early American martial pistols and was carried by both the Army and the Navy.

Bbl. Length: 10" O.A.: 14-1/2" Weight: 2 lbs. 7 oz. Rec. Ball Dia.: .58 Mini Features a walnut stock with case-hardened lock and brass mounted browned barrel. Brass buttplate and trigger guard. Rifled barrel with fixed sights.

Finished	Mod. No. SSF750
Mould .58 cal.	Mod. No. ABM058

NEW

(D) NAVY ARMS BROWN BESS MUSKET— .75 cal.

The nickname "Bess" was derived from Queen Elizabeth I and "Brown" for the finish applied to the barrel. The replica of the Second Model Brown Bess was originally manufactured between 1760 and the mid-1770's and was the major arm of the American Continental Army during the American Revolution. Its popularity continued with Mountain Men long after the War (before the advent of the Hawken), as it was inexpensive, plentiful, much faster to load with its smoothbore barrel and packed a tremendous punch. Each replica is carefully fitted and assembled in virtually the same fashion as its original predecessor. The Musket carries the Colonial Williamsburg hallmark of authenticity. Bbl. Length: 42" O.A.: 59" Weight: 9-1/2 lbs. Rec. Ball Dia.: .735 R.B. Features a polished barrel and lock with brass trigger guard and buttplate.

Finished	Mod. No. BBM709

PERCUSSION

The Percussion Ignition System.

The main charge is muzzle loaded. The hammer is placed in the half cock position and a percussion cap (made of copper and containing a small quantity of priming compound) is placed on the nipple. The nipple has a flash hole bored through it leading directly to the main charge. With the hammer on full cock, the trigger is squeezed, causing the hammer to strike the cap with sufficient force to detonate the priming compound. A flame is forced through the flash hole on the nipple, subsequently igniting the main charge.

(A) KENTUCKY PERC. PISTOL—.44 cal.

Developed after the 1830's, this pistol's only difference from that of the flint pistol is in its ignition system.

Bbl. Length: 10 - 1/8" O.A.: 15 - 1/2"
Weight: 2 lbs. Rec. Ball Dia.: .440 R.B.

(C) HARPERS FERRY MOD. 1855 DRAGOON PISTOL—.58 cal.

Developed at Harpers Ferry Arsenal as a holster pistol for the U.S. Mounted Rifles, this pistol was later fitted with a shoulder stock and designated the Springfield Pistol Carbine Model 1855. Originally issued in pairs and designed to be carried in saddle holsters.

Bbl. Length: 11 - 3/4" O.A.: 18 - 1/2"
Weight: 3 lbs. 14 oz. Rec. Ball Dia.: .577 Mini
Features a color-case hardened lock, brass buttplate and barrel bands.

Shoulder stock optional.

Finished Mod. No. SSP455
Shoulder Stock Mod. No. ASS855

NEW

(D) PHILADELPHIA DERRINGER—.45 cal.

An authentic reproduction of the pocket-sized pistol named after its inventor, Henry Deringer. Features a checkered stock, color-case hardened lock and hammer with German silver-engraved furniture and sights.

Bbl. Length: 3" O.A.: 6 - 1/2"
Weight: 3/4 lbs. Rec. Ball Dia.: .440 R.B.
Finished Mod. No. PHD045
Kit (Page 28) Mod. No. PHDKIT

(E) KENTUCKY PERC. RIFLE—.45 cal.

Originally manufactured between the mid 1820s through the late 1850s when the introduction of the breechloader ended its reign. The majority of Kentucky Rifles were flintlock; however, after the perfection of the percussion system, many of the flintlocks were converted to the percussion system.

Bbl. Length: 35" O.A.: 51"
Weight: 6 lbs. 14 oz. Rec. Ball Dia.: .424 R.B.
Featured a color-case hardened lock, walnut stock, ornate brass patchbox, brass trigger guard and stock fittings.
Finished Mod. No. RPL781

NEW

(F) KENTUCKY PERC. RIFLE—.50 cal. (Not Illus.)

Specifications as above; however in .50 caliber.
Mod. No. RPL881

(G) KENTUCKY PERC. RIFLE—DELUXE—.45 cal.

Same specifications as the Kentucky Percussion Rifle; however, uses silver inlays and silver-plated brass fittings.

Finished Mod. No. RPL783

(H) MISSISSIPPI RIFLE—1841—.58 cal.

This historic percussion lock weapon gained its name as a result of its performance in the hands of Jefferson Davis's Mississippi Regiment during the heroic stand at the Battle of Buena Vista. The Mississippi is also known as the "Yager" (a mis-

spelling of the German Jaeger.) The Rifle was obsolete by 1855; however, it had previously proven so effective that it was rebuilt to take the .58 cal. mini for the Union Army by the Colt Company in 1861.

Bbl. Length: 33" O.A.: .48"
Weight: 9 - 1/2 lbs. Rec. Ball Dia.: .575 Mini

Features a browned barrel, polished brass fittings, with a patchbox for tools and spare parts. Color-case hardened lock, walnut stock, brass buttplate, trigger guard and patchbox.

Finished Mod. No. PRM841
Bayonet Adaptor Mod. No. BRZ410
Leather Sling Mod. No. LES001

ARMS OF THE CONFEDERATE STATES

PERCUSSION REVOLVERS

(A) MOD. 1862 LEECH & RIGDON— .36 cal.

A modern version of the famous Leech & Rigdon Army Revolver. Manufactured during the Civil War in Augusta, Georgia and furnished to many of the Georgia Cavalry units. It is basically a copy of the Colt Navy revolver, but with a round Dragoon-type barrel.

Bbl. length: 7-1/2" O.A.: 13-1/2"
Weight: 2 lbs. 10 oz. Rec. Ball Dia.: .375 R.B.
Features: Brass backstrap and trigger guard. 6-shot. Color-case hardened lock. Bead front sight.
Finished Mod. No. CRP680

(B) REB MOD. 1860—36 or .44 cal.

Also known as the Griswold & Gunnison Revolver, this arm was produced by Samuel Griswold in Griswoldville, Georgia from 1862-1864. No Confederate maker could out do Griswold in quality or quantity. The C.S.A. contracted with Griswold for the Revolver.

Bbl. Length: 7-1/2" O.A.: 13"
Weight: 2 lbs. 12 oz. .36 Rec. Ball Dia.: .375 R.B.
.44 Rec. Ball Dia.: .451 R.B.

Features: Brass frame, brass backstrap, steel barrel and cylinder.

PERCUSSION LONG GUNS

(E) J.P. MURRAY ARTILLERY CARBINE— .58 cal.

Copy of the Carbine used by the Southern Artillery Units during the Civil War.

Originally manufactured by Greenwood & Grey and designed to fire a mini ball. The struggling Confederacy had a difficult time obtaining the raw materials needed for producing firearms, so southern citizens donated brass household items to be melted down and used for buttplates, barrel bands and other parts.

Bbl. Length: 23-1/2" O.A.: 39"
Weight: 7 lbs. 9 oz. Rec. Ball Dia.: .577 Mini
Features: A browned barrel, brass case-hardened lock, blued swivel and barrel springs.
Finished Mod. No. MPC085
Leather Sling Mod. No. LES001

NEW NAVY ARMS CO. ENFIELDS

These percussion long guns were originally produced by the London Armory Company, London, England, and were purchased by the C.S. Government in huge quantities. The Federal Government then followed and later the individual States of the North and South.

(F) 3-BAND ENFIELD—Model 1853— .58 cal.

Bbl. Length: 39" O.A.: 54"
Weight: 9-1/2 lbs.

Features: Traditional Enfield folding ladder rear sight, with an inverted "V" front sight. One-piece solid walnut stock.

Rec. Mould: .577 Mini, .575 R.B. or .580 Maxi.
Finished Mod. No. ENF3BD

Enfield Bayonet & Scabbard Mod. No. ENF5BT

(G) 2-BAND ENFIELD—Model 1858— .58 cal.

Bbl. Length: 33" O.A.: 49"
Weight: 10 lbs.

Features: Folding leaf rear sight, blued percussion rifled barrel. Polished buttplate and trigger guard. Rec. Mould: .577 Mini, .575 R.B. or .580 Maxi.

Finished Mod. No. ENF2BD

(H) ENFIELD MUSKETOON— Model 1861—.58 cal.

The favorite of the Confederate Cavalry.
Bbl. Length: 24" O.A.: 40-1/2"

Weight: 7 lbs.
Features: Folding leaf rear sight, select walnut stock, blued-percussion, rifled barrel. Polished buttplate and trigger guard.

Rec. Mould: .577 Mini, .575 R.B. or .580 Maxi.
Finished Mod. No. ENFMKT

Kit (Page 30) Mod. No. ENFKIT

(I) PARKER HALE WHITWORTH RIFLE—.45 cal.

All Whitworth Rifles used in the Civil War were Confederate. In the Spring of 1863 the Confederates imported from Manchester, England the long-range Whitworth Rifle which proved an effective sniping Rifle being accurate at 1,000 yards.

Bbl. Length: 36" O.A.: 52-1/2"
Weight: 9-1/4 lbs.

Features: Whitworth's patent rifling system. Instead of lands and grooves in conventional barrels, he devised an hexagonal bore with a mechanically fitting bullet, which was ballistically

far superior to the existing Government issue. The .45 cal. bullet could be projected at very high velocities without stripping out of the rifling grooves. Trigger has a detented lock, which is capable of being adjusted very finely without the risk of the sear nose catching on the halfcock bent and permanently damaging both parts. Walnut stock is handchecked at wrist. Comes with an accessory kit, which includes a nipple wrench, mould block, sizer, wad cutter and cleanin brush.

Finished Mod. No. PHM104

NEW

(C) SPRINGFIELD RIFLE—1863—.58 cal.

Originally made by the Springfield Armory. Total quantity produced believed to have been 274,000.

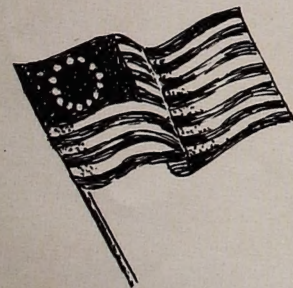

Navy Arms Co. is proud to announce the addition of this authentically reproduced replica of one of America's most historical firearms. The 1863 Springfield Rifle was more efficient than the earlier smoothbores, and it soon became a favorite as the stabilizer of the dreaded mini ball. Navy Arms has carefully reproduced this famous historical rifle down to the last minute detail. A full-size three band musket with a precision rifled barrel in .58 caliber identical to the original in every way. A real must for the serious collector of American replicas. All parts are bright finished.

Bbl. Length: 40" O.A.: 56"
Weight: 9-1/2"

Rec. Ball Dia.: .575 Mini
Walnut stock with polished bright metal lock and stock fittings.

PARKER HALE

Parker Hale Limited of Birmingham, England is the manufacturer of this very fine exact replica of three basic models of the Enfield .577 Rifled Musket. These Muskets were manufactured using the original Enfield gauges, and the quality of these fine Civil War Replicas is beyond reproach. Britain is the home of the Enfield. So, who but Parker Hale can recapture the true character of these famous guns. Parker Hale has the original 120 year old gauges for authentic reference. The original progressive depth rifling has been reproduced. The locks are beautifully color hardened by the original and very costly bone charcoal technique. The tangent sights are the finest mounted on any reproduction rifle. It's craftsmanship like this that creates the best replica firearms.

(D) PARKER-HALE 3-BAND MUSKET—

MOD. 1853—Caliber .577

Bbl. Length: 39" O.A.: 55"
Weight: 9 lbs. Rec. Ball Dia.: .575 Mini

The Enfield Rifle Musket marked the zenith in design and manufacture of the military percussion rifle. The 1853, also known as the Third Model was manufactured between 1858 and 1863 by a large number of Birmingham and London contractors as well as the Royal Small Arms Factory in Enfield and the London Armoury Co.

Finished Mod. No. PHR101
Enfield Bayonet & Scabbard Mod. No. ENFBY7

(E) PARKER-HALE 2-BAND MUSKET—

MOD. 1858—Caliber .577

Bbl. Length: 33" O.A.: 48-1/2"
Weight: 8-1/2 lbs. Rec. Ball Dia.: .575 Mini

In the late 1850's the British Admiralty settled on a pattern of rifle which had a 5-groove barrel of heavy construction. 1 in 48" twist, known as the 1858 "Naval" Rifle.

Finished Mod. No. PHR102

(F) PARKER-HALE MUSKETOON—

MOD. 1861—Caliber .577

Bbl. Length: 24" O.A.: 40-1/4"
Weight: 7-1/2 lbs. Rec. Ball Dia.: .575 Mini

Limited collector's edition with 5-groove barrel, 1 in 48" twist, supplied with many extras; repro. 1859 "Instructions of Musketry" handbook.

Finished Mod. No. PHM103

(G) PARKER HALE VOLUNTEER RIFLE—

.451 caliber

This rifle was created by Parker Hale, Birmingham, England, specifically with the target shooter in mind. It is a true recreation of the type of weapon issued to volunteer regiments during the 1860's. Walnut stock is carefully hand-checked at wrist and forend. The sights are adjustable, globe front and ladder type rear.

Weight: 9-1/2 lbs. Rec. Ball Dia.: .451
Bbl. Length: 32" O.A.: 49"
Finished Mod. No. PHM105

Finished Mod. No. CWS600

* Denotes cartridge firearm which must be shipped to a federally licensed dealer.

THE CLASSIC COLLECTION

(A) NEW ORLEANS ACE—.44 cal.

"Original Gambler's Companion" It was no doubt designed in France and made popular by New Orleans area gunsmiths in the 1840's. An easily concealable weapon with a .44 caliber punch that made it very desirable to gentlemen gamblers of the era. It has been said the Ace is the gun used by John Beauregard to fatally settle his card table quarrel with Beau Jackson in one of the plush casinos of Bourbon Street. Bbl. Length: 3-1/2" O.A.: 9" Weight: 1 lb.

(B) ETHAN ALLEN PEPPERBOX—.36 cal.

"Forerunner of Revolving Handguns" Gold! Gold! The fever that hit its highest peak in 1849, which caused men to desert their families, untie their ties and cut their roots to rush to the fields for their share. They all brought guns to protect their claims and keep their hoard. The most popular gun of the 49'ers was the Pepperbox... four and six-shot Pepperboxes would be seen in many a miner's belt. It gave him the firepower he needed not to be "tested" for his ability to defend himself and his claim!! Bbl. Length: 3-1/8" O.A.: 9" Weight: 2-1/2 lbs. Rec. Ball Dia.: .345 R.B.

Finished Mod. No. CLA02P

Kit (Page 28) Mod. No. CLA02K

(C) DUCKFOOT—.36 cal.

"Early Mutiny and Riot Arm" Swashbuckling riot gun... many sea Captains relied on a brace of these pistols to control a scurvy crew and put down a mutinous rebellion on the high seas. A common sight on the old sailing ships was the first mate standing by with his Duckfoot during ships punishment at the Captain's mast. The crack of the whip and the blood drawn by the lash could excite a crew into mutiny. Six simultaneous shots kept the fear of the Lord in a sailor's heart for who knows, he may be one to take a ball.

Bbl. Length: 2-7/8" O.A.: 10-1/2"

Weight: 2 lbs. Rec. Ball Dia.: .345 R.B.

Finished Mod. No. CLA03P

Kit (Page 28) Mod. No. CLA03K

(D) SNAKE EYES—.36 cal.

"The Deadly Deuce" always meant trouble whether in a pair of dice or two fast shots from the Snake Eyes Pistol.

Bbl. Length: 2-5/8" O.A.: 6-3/4"

Weight: 1-1/2 lbs. Rec. Ball Dia.: .345 R.B.

(H) ELGIN CUTLASS—.44 cal.

The Elgin possesses many desirable collector features. It was the only combination gun (knife and pistol) ever issued by any of the U.S. military services; it was the first percussion handgun officially used by the U.S., and it possesses a superb historical association as being specifically made to outfit the famed Wilkes-South Sea Exploring Expedition, having known use on one of the exotic islands of the South Pacific.

O.A.: 9" (12" blade) Weight: 2 lbs.

ACCESSORIES LISTED ON PAGES 24-27

(L) TINDERLIGHTER

An exact copy of an original British H. Nock tinderlighter. This pistol-like device was used to ignite tinder such as dried moss, bits of rag, amadou or other similar materials. A pull of the trigger causes a piece of flint to strike against steel to make the spark. Such devices date from the 17th, 18th and 19th Centuries and were made in various countries, including Spain, Sweden, Scotland, Switzerland, Belgium, France, Austria, Holland, Germany and Italy. Some were made by noted gunmakers and were signed with makers' names so that the origins can be traced. Used in Colonial homes in America, tinder pistols were designed with a candleholder or socket on the side and are especially desirable to collectors.

O.A. Length: 5-1/2" O.A.: Height: 3-7/8"

O.A. Width: 3-1/4" Weight: 3/4 lb.

Features one-piece walnut grips, solid brass frame, forelegs and candleholder. Color-case hardened hammer and frizzen. Flint included. Add a touch of Colonial America to your mantel.

Finished Mod. No. TDLBOX

Kit (Page 28) Mod. No. TDL075

The Classic Collection is manufactured in the U.S.A.

MUZZLE LOADING HUNTING GUNS

Black powder fever is currently sweeping the country. Many states have now set aside special hunting seasons for primitive firearms, and with the rapidly growing number of black powder shooters, it is very likely that more states will follow suit.

(A) CLASSIC SIDE BY SIDE SHOTGUN—12 ga.

Navy Arms Co. is proud to introduce its new Side-by-Side Double Barrel Percussion Muzzle Loading Shotgun featuring heavy duty custom construction throughout. Manufactured in the popular 12 gauge, it is designed to use any modern plastic shot shell wads. The barrels are 30" long and are muzzleloader choked cylinder and cylinder. The genuine walnut stock is finely grained, oil finished wood and all fittings are color case hardened, including lock, plates and hammers. This exciting new magnum muzzle-loader features a bar lock-type action and heavily reinforced breeches that lock into the bar, giving additional strength and overall stiffness to the action. All internal parts are steel.

Bbl. Length: 30" O.A.: 44"
Weight: 7 lbs. 12 oz.
Finished Mod. No. PIG200
Kit (Page 30) Mod. No. KSC300

(C) TERRY TEXAS RANGER—.12 ga.

Used during the Civil War by a Confederate Cavalry group from Texas. This unit was armed with double-barrel shotguns sporting short barrels. Color-case hardened locks.

Bbl. Length: 14" O.A.: 30"
Weight: 6 lbs.
Finished Mod. No. TXS012

(D) MORSE SHOTGUN—12 ga.

The Morse/Navy Single Barrel 12 ga. Muzzle Loading Shotgun is a well-balanced, American made replica featuring a highly polished brass receiver with select American walnut. Navy Arms has improved upon the old Morse design to modernize this into a contemporary and exciting configuration. Bead front-sight. Made in U.S.A.

Bbl. Length: 26" O.A.: 43"
Weight: 5 lbs. 12 oz.

(F) NAVY ARMS MARK I HAWKEN RIFLE—.50 & .54 caliber. Percussion (Not illus.)

This new Hawken has been designed specifically for the maxi ball. It features an American walnut stock with cheek rest, double set triggers, adjustable William's rear sight, blade front sight and an engraved blued lock. The blued barrel features Navy's famous precision rifled Pre-StraightenedTM octagonal barrel and polished brass furniture. Another new feature is the stainless steel insert which reduces the size of the chamber, as was popular in fine British Target Rifles. Made in U.S.A. Percussion

Val Forgett, President of Navy Arms Company, is proud to announce the acquisition by Navy Arms Company of the Black Powder Division of the Ithaca Gun Company. All parts are manufactured in the U.S. The design is based on an original model of the 19th century. All furniture is browned steel, except for the forearm cap and wedge escutcheons which are German silver. The Rifle sports a 32" octagonal barrel, two barrel keys, buckhorn-style rear sight, double set triggers, hooked breech, Hawken-style toe and buttplates, lock bolt inlays, barrel wedges, entry thimbles, trigger guard, ramrod and cleaning jag, nipple and nipple wrench. Rifle twist one in 60 inches.

(H) ITHACA/NAVY HAWKEN RIFLE—.50 & .54 cal.-Percussion

Navy Arms Co. continues to offer the .50 caliber Ithaca/Navy Hawken Rifle as was originally produced by the Ithaca Gun Company. We have now added to the line a .54 caliber version of the original. Same specifications as above; however, features a percussion lock. Made in U.S.A.

(A) ROLLING BLOCK ACTIONS*

For those who desire to have a custom made rifle, Navy Arms offers the Rolling Block actions, both milled from solid steel in a large and small size, for sale to custom builders and gunsmiths.

Small Mod. No. RBS357

Large Mod. No. RBL045

BARRELED ROLLING BLOCK ACTIONS*

We are now proud to present Rolling Block Actions, barreled with the famous Navy Arms Pre-Straightened™ barrel, which is made from quality ordnance steel and precision rifled to exacting specifications. These barrels are available in round, octagon and half round-half octagon con-

figurations with a choice of 45-70 or 50-70 calibers. We also have an 18" carbine model or a 26" and 30" rifle model available. Specify caliber and style when ordering. 18" barrel, Mod. No. BRB018; 26" barrel Mod. No. BRB026; 30" barrel Mod. No. BRB030.

ROLLING BLOCK FINISHED BARRELED ACTIONS*

The same as our barreled actions except that the barrel is polished, blued and has the sights installed. Specify caliber, barrel length and style when ordering.

Mod. No. FBA010

CARTRIDGE BARRELS

(B) PRE-STRAIGHTENED™ BARREL

Navy Arms is now manufacturing their own line of Pre-Straightened™ super barrels. By engaging the latest manufacturing techniques, they are not only totally uniform in boring, but each barrel is individually checked for straightness. The rifling is done by the latest button swedging and forging techniques, and the final product is the best hunk of shooting pipe ever offered to the American sportsman. We are proud to offer this complete selection of barrels to the custom builder looking for that little extra built-in accuracy and dependability.

SIAMESE MAUSER BARRELS

PRE-STRAIGHTENED™ .45-70* CAL.

KITS FOR THE CRAFTSMAN

Many kits are available on the market. Some require only a little sanding and finishing—others require much more detailed work. We suggest you start your first kit with something fairly small and relatively simple. You will then have acquired most of the basic tools and some experience in building something a little more difficult.

Navy Arms Kits incorporate the highest quality component parts and barrels that Navy Arms uses in their completed guns. Stocks are 90% inletted, and metal parts require a minimum amount of finishing and polishing. With care and patience, one can attain a finished firearm equal in quality and finish to their factory assembled guns.

FINISHING YOUR KIT

ITEMS NEEDED

1. Screw Driver that fits screws
2. Small Hammer
3. Wedge Tool
4. 8" x 1" Flat File
5. Sheets of Emery Cloth—approximate grit size
 - (a) 200 grit 1 sheet
 - (b) 400 grit 1 sheet
 - (c) 600 grit 1 sheet
 - (d) Crocus Cloth 1 sheet
 - (e) 180 grit Sandpaper for wood grips 1 sheet

6. Cold Bluing or Browning Kit
7. Clean Cloth
8. Cleaning Solvent to remove oil
9. Linseed Oil or some type of wood sealer/finisher.
10. Can of Gun Oil

STEPS FOR FINISHING

1. Disassemble
2. Draw file tool marks from metal parts
3. Finish grips so they fit metal
4. Wrap emery cloth over file and polish out file marks
 - (a) Use progressively finer emery cloth until all marks are out and metal is bright and shines
 - (b) Clean all polished parts with solvent making sure all oil is removed
 - (c) Cold blue or brown parts—NOTE: Brass will not blue or brown.
 - (d) Polish brass with brass polish
 - (e) Oil thoroughly blued or browned pieces
 - (f) Reassemble pistol

NOTE: All steel parts may be hot blued. Check with your local gun shop for this service.

NEW

(A) TINDERBOX LIGHTER KIT

An exact copy of an original British H. Nock Tinder Lighter. Featured on the Catalog Cover. Kit Mod. No. TDL075

PARTS INQUIRIES: Please send self-addressed stamped return envelope Attn: Customer Service.

BLACK POWDER REVOLVER KITS NAVY ARMS CO.

NEW

WE HAVE REDESIGNED FOR YOUR CONVENIENCE IN ASSEMBLY & HANDLING, OUR NAVY ARMS REVOLVER KIT PACKAGING. EACH KIT COMES WITH COMPLETE ASSEMBLY INSTRUCTIONS, PARTS PRICE LIST AND LOADING INSTRUCTIONS.

(B) REMINGTON-style PERCUSSION REVOLVER KIT—.36 or .44 cal.

All metal parts are completely milled. They will require very light buffing and finishing. The barrel is rifled and ready for finishing. Barrel, frame and cylinder are preassembled. All screws are furnished and all screw holes have been drilled and tapped. Upon completion, all steel parts should be blued and the grips finished. Loading lever, plunger assembly, hammer and trigger are blued and do not require finishing. Kit comes with steel frame.

CLASSIC ARMS LTD.

Building a Classic Arms Muzzleloading Gun has proven to be an extremely popular and fascinating pastime. The basic elements are here to complete a truly fine display or shooting piece and with most of the difficult work done these kits can be assembled by the reasonably adept do-it-yourselfer with just the tools in his workshop.

Each kit comes with a detailed list showing suggested tools for assembly, parts schematic, assembly instructions, parts price list and firing instructions.

Completed guns described on Page 18

Kit—.50 cal. Mod. No. INHKF3
Kit—.54 cal. Mod. No. INHKF5

(E) MORSE RIFLE KIT—

All parts are machined and ready for final assembly and finishing. American walnut stock. Percussion only. Complete gun described on Page 20.
Kit—.45 cal. Mod. No. KMR045
Kit—.50 cal. Mod. No. KMR050
Kit—.58 cal. Mod. No. KMR054

(F) MORSE SHOTGUN KIT—

12 ga.—Single Barrel.
This pre-assembled kit is manufactured entirely in the U.S. Features an American walnut stock. Barrel requires draw filing and polishing. Stock requires sanding and staining. Stock is 90% inletted. Finished gun described on Page 20.
Kit Mod. No. RPMKIT

(G) ENFIELD MUSKETOON KIT— Percussion Mod. 1861—.58 cal.

Features walnut stock, stock 100% inletted, barrel requires polishing and bluing. Complete gun described on Page 10.
Kit Mod. No. ENFKIT

(H) CLASSIC SIDE BY SIDE SHOTGUN KIT—12 ga.—Double Barrel.

This kit is 100% inletted. Wood requires sanding and staining. Barrel requires browning or bluing depending upon ones taste. Completed gun described on Page 20.
Kit Mod. No. KSC300

NEW

(I) CLASSIC SIDE BY SIDE SHOTGUN KIT—10 ga.—Double Barrel.

Due to the tremendous number of requests for a 10 ga. double barrel shotgun, we are currently producing same in kit form and finished. See Page 20. (Not illus.)
Kit Mod. No. KSC600

(J) SPRINGFIELD RIFLE KIT—1863— Percussion .58 cal.

Kit version of the 1863 Springfield with a 40" barrel. No tapping required. Stock 90% inletted. Complete gun described on Page 14.
Kit Mod. No. KSF063

(K) BROWN BESS MUSKET— Flint—.75 cal.

This kit is assembled and the stock is 100% inletted. The stock requires sanding and staining. Complete gun described on Page 6.
Kit Mod. No. KBM791

FINISHING YOUR KIT

ITEMS NEEDED

1. Screw Driver that fits screws
2. Small Hammer
3. Wedge Tool
4. 8" x 1" Flat File
5. Sheets of Emery Cloth—approximate grit size
 - (a) 200 grit 1 sheet
 - (b) 400 grit 1 sheet
 - (c) 600 grit 1 sheet
 - (d) Crocus Cloth 1 sheet
 - (e) grit Sandpaper for wood grips 1 sheet
6. Cold Bluing or Browning Kit
7. Clean Cloth
8. Cleaning Solvent to remove oil
9. Linseed Oil or some type of wood sealer/finisher
10. Can of Gun Oil

STEPS FOR FINISHING

1. Disassemble
2. Draw file tool marks from metal parts
3. Finish grips so they fit metal
4. Wrap emery cloth over file and polish out file marks
 - (a) Use progressively finer emery cloth until all marks are out and metal is bright and shines
 - (b) Clean all polished parts with solvent making sure all oil is removed
 - (c) Cold blue or brown parts—NOTE: Brass will not blue or brown
 - (d) Polish brass with brass polish
 - (e) Oil thoroughly blued or browned pieces.
 - (f) Reassemble pistol

NOTE: All steel parts may be hot blued. Check with you local gun shop for this service.

WRENCHES					RETURNS				
26X	ANW741	3.00	2.25	1.80	In conformity with present day commercial practice we cannot accept goods returned for credit unless they are DEFECTIVE or NOT AS ORDERED, and buyer should in all cases write to us for approval of the return BEFORE forwarding same. If merchandise is being returned for any other reason than mentioned, if accepted a 15% restocking fee will be applied.				
	ANW842	3.00	2.25	1.80	All claims must be made within 30 days of receipt of merchandise. A copy of the invoice must accompany every return. Please be sure to include your name and address. Address all returns to: Navy Arms Co., 689 Bergen Blvd., Ridgefield, N.J. 07657 Attn: Customer Service				
	ANW742	3.50	2.75	2.50	DO NOT SHIP REPAIR ITEMS BEFORE WRITING. Many times there is actually no repair problem involved, some points of operation are sometimes not understood and can be solved by steps which are considerably easier than returning the item.				
	ANW092	3.00	2.25	1.80	Claims relating to transit damage must be made directly with the carrier within 5 days of receipt of merchandise.
